# Chapter 1

## Robot ROS

### 1.1 Principal function

function `main` : init function and start kernel.

function `microros_task` : Create the publishers and the subscribers and exploit them.

function `task_Motor_Left` : Control the left motor.

function `task_Motor_Right` : Control the right motor.

function `task_VL53` : Get the VL53 measure and put it in the queue.

function `task_Grove_LCD` : Get the information from the queue and print it on the LCD.

function `task_Supervision` : The brain's robot decide of the action depending of data receive from microROS.

### 1.2 Secondary function

function `createPublisher` : use to create a default publisher.

function `createSubscriber` : use to create a default subscriber.

function `CHECKMRRET` : Test if a microRos function success else print error message.

function `SubscriberCallbackFunction` : callback call when message is receive.

### 1.3 Test function

function `test_uart2` : Test printf and scanf.

function `test_vl53` : Test VL53 sensors.

function `test_motor` : Test correcteur.

## 1.4 Config define

### 1.4.1 Config exo

### 1.4.2 Config param

## Chapter 4

# Data Structure Documentation

### 4.1 AMessage Struct Reference

#### Data Fields

- char [command](#)
- int [data](#)

#### 4.1.1 Detailed Description

Use to send data to lcd's task

Definition at line [111](#) of file [main.c](#).

#### 4.1.2 Field Documentation

##### 4.1.2.1 command

```
char command
```

Represent the direction of the robot

Definition at line [113](#) of file [main.c](#).

##### 4.1.2.2 data

```
int data
```

Represent the mode of the robot

Definition at line [114](#) of file [main.c](#).

The documentation for this struct was generated from the following file:

- C:/Users/Administrator/Documents/GitHub/ENIB\_Robot\_Mobile\_Ros2/WORKSPACE\_F411\_uROS6/base↵  
\_robot/Core/Src/[main.c](#)

## 4.2 MicroRosPubMsg Struct Reference

### Data Fields

- char [dir](#)
- int [mode](#)
- int [speed](#)

### 4.2.1 Detailed Description

Use to send information from the task decision to microRos task

Definition at line [120](#) of file [main.c](#).

### 4.2.2 Field Documentation

#### 4.2.2.1 dir

```
char dir
```

Represent the direction of the robot

Definition at line [122](#) of file [main.c](#).

#### 4.2.2.2 mode

```
int mode
```

Represent the mode of the robot

Definition at line [123](#) of file [main.c](#).

#### 4.2.2.3 speed

```
int speed
```

Represent the speed of the robot

Definition at line [124](#) of file [main.c](#).

The documentation for this struct was generated from the following file:

- C:/Users/Administrator/Documents/GitHub/ENIB\_Robot\_Mobile\_Ros2/WORKSPACE\_F411\_uROS6/base↔  
\_robot/Core/Src/[main.c](#)

## 4.3 MicroRosSubMsg Struct Reference

### Data Fields

- int [dir](#)
- int [x](#)
- int [y](#)
- int [mode](#)
- int [speed](#)

### 4.3.1 Detailed Description

Use to send information get by microRos to decision task

Definition at line [130](#) of file [main.c](#).

### 4.3.2 Field Documentation

#### 4.3.2.1 dir

```
int dir
```

Represent the direction send by the IHM

Definition at line [132](#) of file [main.c](#).

#### 4.3.2.2 mode

```
int mode
```

Represent the mode send by the IHM

Definition at line [135](#) of file [main.c](#).

#### 4.3.2.3 speed

```
int speed
```

Represent the speed send by the IHM

Definition at line [136](#) of file [main.c](#).

#### 4.3.2.4 x

```
int x
```

Represent the x position send by the camera

Definition at line [133](#) of file [main.c](#).

#### 4.3.2.5 y

```
int y
```

Represent the y position send by the camera

Definition at line 134 of file [main.c](#).

The documentation for this struct was generated from the following file:

- C:/Users/Administrator/Documents/GitHub/ENIB\_Robot\_Mobile\_Ros2/WORKSPACE\_F411\_uROS6/base\_↔  
\_robot/Core/Src/[main.c](#)

## 4.4 SequenceStepEnables Struct Reference

### Data Fields

- uint8\_t [tcc](#)
- uint8\_t [msrc](#)
- uint8\_t [dss](#)
- uint8\_t [pre\\_range](#)
- uint8\_t [final\\_range](#)

### 4.4.1 Detailed Description

Definition at line 300 of file [VL53L0X.h](#).

### 4.4.2 Field Documentation

#### 4.4.2.1 dss

```
uint8_t dss
```

Definition at line 301 of file [VL53L0X.h](#).

#### 4.4.2.2 final\_range

```
uint8_t final_range
```

Definition at line 301 of file [VL53L0X.h](#).

#### 4.4.2.3 msrc

```
uint8_t msrc
```

Definition at line 301 of file [VL53L0X.h](#).

#### 4.4.2.4 pre\_range

```
uint8_t pre_range
```

Definition at line 301 of file [VL53L0X.h](#).

#### 4.4.2.5 tcc

```
uint8_t tcc
```

Definition at line 301 of file [VL53L0X.h](#).

The documentation for this struct was generated from the following file:

- C:/Users/Administrator/Documents/GitHub/ENIB\_Robot\_Mobile\_Ros2/WORKSPACE\_F411\_uROS6/base↵\_robot/Core/Inc/[VL53L0X.h](#)

## 4.5 SequenceStepTimeouts Struct Reference

### Data Fields

- uint16\_t [pre\\_range\\_vcsel\\_period\\_pclks](#)
- uint16\_t [final\\_range\\_vcsel\\_period\\_pclks](#)
- uint16\_t [msrc\\_dss\\_tcc\\_mclks](#)
- uint16\_t [pre\\_range\\_mclks](#)
- uint16\_t [final\\_range\\_mclks](#)
- uint32\_t [msrc\\_dss\\_tcc\\_us](#)
- uint32\_t [pre\\_range\\_us](#)
- uint32\_t [final\\_range\\_us](#)

### 4.5.1 Detailed Description

Definition at line 304 of file [VL53L0X.h](#).

### 4.5.2 Field Documentation

#### 4.5.2.1 final\_range\_mclks

```
uint16_t final_range_mclks
```

Definition at line 307 of file [VL53L0X.h](#).

#### 4.5.2.2 final\_range\_us

```
uint32_t final_range_us
```

Definition at line 308 of file [VL53L0X.h](#).

#### 4.5.2.3 final\_range\_vcsel\_period\_pclks

```
uint16_t final_range_vcsel_period_pclks
```

Definition at line 305 of file [VL53L0X.h](#).

#### 4.5.2.4 msrc\_dss\_tcc\_mclks

```
uint16_t msrc_dss_tcc_mclks
```

Definition at line 307 of file [VL53L0X.h](#).

#### 4.5.2.5 msrc\_dss\_tcc\_us

```
uint32_t msrc_dss_tcc_us
```

Definition at line 308 of file [VL53L0X.h](#).

#### 4.5.2.6 pre\_range\_mclks

```
uint16_t pre_range_mclks
```

Definition at line 307 of file [VL53L0X.h](#).

#### 4.5.2.7 pre\_range\_us

```
uint32_t pre_range_us
```

```

Definition at line 218 of file [main.h](#).

### 5.8.3 Function Documentation

#### 5.8.3.1 CHECKMRRET()

```
void CHECKMRRET (  
    rcl_ret_t ret,  
    char * msg )
```

check if microRos function success else print msg in console

**Parameters**

<i>ret</i>	return value of microRos function
<i>msg</i>	message to print if fail

Definition at line 154 of file [main.c](#).

**5.8.3.2 Error\_Handler()**

```
void Error_Handler (
    void )
```

Definition at line 926 of file [main.c](#).

**5.8.3.3 main()**

```
int main (
    void )
```

Init all GPIO and drivers, start the task, init semaphore and queue and launch the kernel

- Config EXSTARTUP
  - Launch microRos, supervision, left motor, right motor and lcd task
- Config EXTEST\_UART2
  - Launch test\_uart2 task
- Config EXCORRECTOR
  - Launch test\_motor task
- Config EXTESTCORRECTOR
  - Launch supervision, left motor and right motor task
- Config EXTEST\_VL53
  - Launch test\_vl53 task
- Config EXTEST\_MICROROS
  - Launch microRos task
- Config EXFINAL
  - Launch microRos, supervision, left motor, right motor, vl53 and lcd task

Definition at line 760 of file [main.c](#).

#### 5.8.3.4 microros\_task()

```
void microros_task (
    void * argument )
```

- All config
  - Create the node *STM32\_node*
  - Set the Domain id of microRos
- Config EXSTARTUP :
  - Create a publisher and send a message on it
- Config EXTEST\_MICROROS :
  - Create a publisher, a subscriber and an executor
  - Init the executor and add the subscriber to it
  - Run the executor and send the receive message on the publisher
- Config EXFINAL :
  - Create 3 publishers, 5 subscriber and an executor
  - Init the executor and add the 5 subscribers to it
  - run the executor and if they are no elements waiting to be read by the task decision put the receive information in the queue If decison task send data then publish data to microRos

##### Parameters

<i>argument</i>	
-----------------	--

Definition at line 168 of file [main.c](#).

#### 5.8.3.5 SubscriberCallbackFunction()

```
void SubscriberCallbackFunction (
    const void * msgin )
```

callback call by microros when a message is receive here use as debug and just print the receive msg

##### Parameters

<i>message</i>	receive
----------------	---------

Definition at line 156 of file [main.c](#).

#### 5.8.3.6 task\_Grove\_LCD()

```
void task_Grove_LCD (
    void * pvParameters )
```

Task use to write information on LCD depending of the data in the LCD queue

- Config EXSTARTUP :
  - Print 'TEST' LCD on screen
- Config EXFINAL :
  - Print different messages depending of the actual mode

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line [473](#) of file [main.c](#).

#### 5.8.3.7 task\_Motor\_Left()

```
void task_Motor_Left (
    void * pvParameters )
```

Task use to control the left motor of the robot

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line [385](#) of file [main.c](#).

#### 5.8.3.8 task\_Motor\_Right()

```
void task_Motor_Right (
    void * pvParameters )
```

Task use to control the right motor of the robot

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line [411](#) of file [main.c](#).

#### 5.8.3.9 task\_Supervision()

```
void task_Supervision (
    void * pvParameters )
```

Brain of the robot. get information for MicroRos and VL53 task, then send speed to left and right motor, lcd and microRos task

- Config EXSTARTUP :

- Make the robot drive forward until an obstacle are found
- Config EXTESTCORRECTOR :
  - Make the robot drive forward at speed set by config
- Config EXFINAL :
  - Make robot switch between 3 behaviour depending of the mode
  - Obstacle : drive and avoid obstacles
  - Manual : drive in direction set in ihm
  - Camera : follow an object

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line 508 of file [main.c](#).

#### 5.8.3.10 task\_VL53()

```
void task_VL53 (  
    void * pvParameters )
```

task that get the value of the VL53 sensor and put it on the VL53 queue

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line 438 of file [main.c](#).

#### 5.8.3.11 test\_motor()

```
void test_motor (  
    void * pvParameters )
```

Use to set the duty cycle and register the motor speed at each Te

Definition at line 880 of file [main.c](#).

#### 5.8.3.12 test\_uart2()

```
void test_uart2 (  
    void * pvParameters )
```

Use to test printf and scanf function

Definition at line 857 of file [main.c](#).

### 5.8.3.13 test\_vl53()

```
void test_vl53 (
    void * pvParameters )
```

Use to test the VL53 sensor

Definition at line 869 of file [main.c](#).

### 5.10.1 Detailed Description

: Contain microROS topic and default custom creator for subscriber and publisher

Definition in file [microROS.h](#).

### 5.10.2 Macro Definition Documentation

#### 5.10.2.1 ARRAY\_LEN

```
#define ARRAY_LEN 100
```

Length of string messages

Definition at line 10 of file [microROS.h](#).

#### 5.10.2.2 CAMERA\_X\_TOPIC

```
#define CAMERA_X_TOPIC "camera/X"
```

Topic name of x camera subscriber

Definition at line 14 of file [microROS.h](#).

#### 5.10.2.3 CAMERA\_Y\_TOPIC

```
#define CAMERA_Y_TOPIC "camera/Y"
```

Topic name of y camera subscriber

Definition at line 15 of file [microROS.h](#).

#### 5.10.2.4 CAPTEUR\_DIR\_TOPIC

```
#define CAPTEUR_DIR_TOPIC "capteur/dir"
```

Topic name of direction publisher

Definition at line 11 of file [microROS.h](#).

#### 5.10.2.5 CONFIG\_MODE\_TOPIC

```
#define CONFIG_MODE_TOPIC "mode"
```

Definition at line 17 of file [microROS.h](#).

#### 5.10.2.6 CONFIG\_SPEED\_TOPIC

```
#define CONFIG_SPEED_TOPIC "speed"
```

Definition at line 18 of file [microROS.h](#).

#### 5.10.2.7 ETAT\_MODE\_TOPIC

```
#define ETAT_MODE_TOPIC "etat/mode"
```

Topic name of mode publisher

Definition at line 12 of file [microROS.h](#).

#### 5.10.2.8 ETAT\_SPEED\_TOPIC

```
#define ETAT_SPEED_TOPIC "etat/speed"
```

Topic name of speed publisher

Definition at line 13 of file [microROS.h](#).

#### 5.10.2.9 TELECOMMANDE\_DIR\_TOPIC

```
#define TELECOMMANDE_DIR_TOPIC "direction"
```

Definition at line 16 of file [microROS.h](#).

### 5.10.3 Function Documentation

#### 5.10.3.1 createPublisher()

```
void createPublisher (
    rcl_publisher_t * publisher,
    const rcl_node_t * node,
    const rosidl_message_type_support_t * type_support,
    const char * topic_name,
    std_msgs__msg__Int32 * msg )
```

Create a publisher with default options

## Parameters

<i>publisher</i>	microRos structure that represent a publisher
<i>node</i>	microRos structure that represent a node
<i>type_support</i>	microRos structure that represent the type of message
<i>topic_name</i>	The name of the topic
<i>msg</i>	microRos structure that represent the message

Definition at line 10 of file [microROS.c](#).

### 5.10.3.2 createSubscriber()

```
void createSubscriber (
    rcl_subscription_t * subscription,
    rcl_node_t * node,
    const rosidl_message_type_support_t * type_support,
    const char * topic_name,
    std_msgs__msg__Int32 * msg )
```

Create a subscriber with default options

## Parameters

<i>subscription</i>	microRos structure that represent a subscriber
<i>node</i>	microRos structure that represent a node
<i>type_support</i>	microRos structure that represent the type of message
<i>topic_name</i>	The name of the topic
<i>msg</i>	microRos structure that represent the message

Definition at line 29 of file [microROS.c](#).

### 5.17.2 Function Documentation

#### 5.17.2.1 BusFault\_Handler()

```
void BusFault_Handler (  
    void )
```

Definition at line 38 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.2 DebugMon\_Handler()

```
void DebugMon_Handler (  
    void )
```

Definition at line 55 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.3 DMA1\_Stream5\_IRQHandler()

```
void DMA1_Stream5_IRQHandler (  
    void )
```

Definition at line 66 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.4 DMA1\_Stream6\_IRQHandler()

```
void DMA1_Stream6_IRQHandler (  
    void )
```

Definition at line 72 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.5 DMA2\_Stream2\_IRQHandler()

```
void DMA2_Stream2_IRQHandler (  
    void )
```

Definition at line 97 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.6 DMA2\_Stream7\_IRQHandler()

```
void DMA2_Stream7_IRQHandler (  
    void )
```

Definition at line 102 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.7 HardFault\_Handler()

```
void HardFault_Handler (  
    void )
```

Definition at line 22 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.8 MemManage\_Handler()

```
void MemManage_Handler (  
    void )
```

Definition at line 30 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.9 NMI\_Handler()

```
void NMI_Handler (  
    void )
```

Definition at line 15 of file [stm32f4xx\\_it.c](#).

#### 5.17.2.10 UsageFault\_Handler()

```
void UsageFault_Handler (  
    void )
```

This function handles Undefined instruction or illegal state.

Definition at line 48 of file [stm32f4xx\\_it.c](#).

### 5.17.2.11 USART1\_IRQHandler()

```
void USART1_IRQHandler (
    void )
```

Definition at line 87 of file [stm32f4xx\\_it.c](#).

### 5.17.2.12 USART2\_IRQHandler()

```
void USART2_IRQHandler (
    void )
```

Definition at line 92 of file [stm32f4xx\\_it.c](#).

### 5.30.1 Detailed Description

file that contain the main code

Definition in file [main.c](#).

### 5.30.2 Macro Definition Documentation

#### 5.30.2.1 CAMERA\_X\_MAX

```
#define CAMERA_X_MAX 640
```

Define maximal x position return by camera

Definition at line [73](#) of file [main.c](#).

#### 5.30.2.2 CAMERA\_X\_MIN

```
#define CAMERA_X_MIN 0
```

Define minimal x position return by camera

Definition at line [72](#) of file [main.c](#).

#### 5.30.2.3 CAMERA\_Y\_MAX

```
#define CAMERA_Y_MAX 480
```

Define maximal y position return by camera

Definition at line [75](#) of file [main.c](#).

#### 5.30.2.4 CAMERA\_Y\_MIN

```
#define CAMERA_Y_MIN 0
```

Define minimal y position return by camera

Definition at line [74](#) of file [main.c](#).

#### 5.30.2.5 CMD

```
#define CMD 1000
```

Can be use as default speed

Definition at line 66 of file [main.c](#).

#### 5.30.2.6 DEBUG\_MOTOR

```
#define DEBUG_MOTOR 0
```

Activate motor debug print

Definition at line 56 of file [main.c](#).

#### 5.30.2.7 DEBUG\_PRINTF

```
#define DEBUG_PRINTF 0
```

Activate debug print

Definition at line 55 of file [main.c](#).

#### 5.30.2.8 DEFAULT\_DIR

```
#define DEFAULT_DIR STOP
```

Default direction at startup

Definition at line 82 of file [main.c](#).

#### 5.30.2.9 DEFAULT\_MODE

```
#define DEFAULT_MODE MODE_ZIG
```

Default mode at startup

Definition at line 80 of file [main.c](#).

#### 5.30.2.10 DEFAULT\_SPEED

```
#define DEFAULT_SPEED LOW
```

Default speed at startup

Definition at line 81 of file [main.c](#).

#### 5.30.2.11 EXCORRECTOR

```
#define EXCORRECTOR 2
```

Code to calibrate your correcteur

Definition at line 41 of file [main.c](#).

#### 5.30.2.12 EXFINAL

```
#define EXFINAL 6
```

Final code

Definition at line 45 of file [main.c](#).

#### 5.30.2.13 EXSTARTUP

```
#define EXSTARTUP 0
```

startup code

Definition at line 39 of file [main.c](#).

#### 5.30.2.14 EXTEST\_MICROROS

```
#define EXTEST_MICROROS 5
```

Test Micro ROS subscriber and publisher

Definition at line 44 of file [main.c](#).

#### 5.30.2.15 EXTEST\_UART2

```
#define EXTEST_UART2 1
```

Test printf and scanf function

Definition at line 40 of file [main.c](#).

#### 5.30.2.16 EXTEST\_VL53

```
#define EXTEST_VL53 4
```

Test VL530X sensor

Definition at line 43 of file [main.c](#).

#### 5.30.2.17 EXTESTCORRECTOR

```
#define EXTESTCORRECTOR 3
```

Code to test your correcteur

Definition at line 42 of file [main.c](#).

#### 5.30.2.18 LCD

```
#define LCD 1
```

Activate LCD task

Definition at line 52 of file [main.c](#).

#### 5.30.2.19 LKi

```
#define LKi (5.0/(0.1*40.0))
```

Ki factor for the left motor

Definition at line 61 of file [main.c](#).

#### 5.30.2.20 LKp

```
#define LKp 0.001
```

Kp factor for the left motor

Definition at line 60 of file [main.c](#).

#### 5.30.2.21 MICROROS

```
#define MICROROS 1
```

Activate MicroROS task

Definition at line 54 of file [main.c](#).

#### 5.30.2.22 NB

```
#define NB 200
```

Number of samples in correcteur calibration task

Definition at line 85 of file [main.c](#).

#### 5.30.2.23 RKi

```
#define RKi (5.0/(0.1*40.0))
```

Kp factor for the right motor

Definition at line 63 of file [main.c](#).

#### 5.30.2.24 RKp

```
#define RKp 0.001
```

Kp factor for the right motor

Definition at line 62 of file [main.c](#).

#### 5.30.2.25 ROS\_DOMAIN\_ID

```
#define ROS_DOMAIN_ID 0
```

Define ROS domain id

Definition at line 51 of file [main.c](#).

#### 5.30.2.26 SAMPLING\_PERIOD\_ms

```
#define SAMPLING_PERIOD_ms 5
```

Define the delay between two execution of the same task

Definition at line 37 of file [main.c](#).

#### 5.30.2.27 SEUIL\_DIST\_SENSOR

```
#define SEUIL_DIST_SENSOR 800
```

Define the trigger for forward sensors4

Definition at line 50 of file [main.c](#).

#### 5.30.2.28 SYNCHRO\_EX

```
#define SYNCHRO_EX EXFINAL
```

Define wich config are executed

Definition at line 47 of file [main.c](#).

#### 5.30.2.29 Te

```
#define Te SAMPLING_PERIOD_ms
```

Definition at line 59 of file [main.c](#).

#### 5.30.2.30 TEST\_CORRECTOR\_DUTY

```
#define TEST_CORRECTOR_DUTY 150
```

Duty cycle to apply to calibrate the correcteur

Definition at line 86 of file [main.c](#).

#### 5.30.2.31 TEST\_CORRECTOR\_SPEEDL

```
#define TEST_CORRECTOR_SPEEDL -100
```

Speed to test the left correcteur

Definition at line 87 of file [main.c](#).

#### 5.30.2.32 TEST\_CORRECTOR\_SPEEDR

```
#define TEST_CORRECTOR_SPEEDR -100
```

Speed to test the right correcteur

Definition at line 88 of file [main.c](#).

#### 5.30.2.33 TEST\_LEFT\_MOTOR

```
#define TEST_LEFT_MOTOR 1
```

Calibrate left motor correcteur or not

Definition at line 89 of file [main.c](#).

#### 5.30.2.34 VITESSE\_CAM

```
#define VITESSE_CAM CMD/3
```

Default speed for camera mode

Definition at line 69 of file [main.c](#).

### 5.30.2.35 VITESSE\_KART

```
#define VITESSE_KART CMD/2
```

Default speed for manual mode

Definition at line 67 of file [main.c](#).

### 5.30.2.36 VITESSE\_OBS

```
#define VITESSE_OBS CMD
```

Default speed for obstacle mode

Definition at line 68 of file [main.c](#).

### 5.30.2.37 VL53

```
#define VL53 1
```

Activate VL530X task

Definition at line 53 of file [main.c](#).

## 5.30.3 Enumeration Type Documentation

### 5.30.3.1 anonymous enum

```
anonymous enum
```

enumerate mode of robot

Definition at line 31 of file [main.c](#).

### 5.30.3.2 anonymous enum

```
anonymous enum
```

enumerate speed

Definition at line 33 of file [main.c](#).

### 5.30.3.3 anonymous enum

```
anonymous enum
```

enumerate direction

Definition at line 35 of file [main.c](#).

## 5.30.4 Function Documentation

### 5.30.4.1 CHECKMRRET()

```
void CHECKMRRET (
    rcl_ret_t ret,
    char * msg )
```

check if microRos function success else print msg in console

#### Parameters

<i>ret</i>	return value of microRos function
<i>msg</i>	message to print if fail

Definition at line 154 of file [main.c](#).

#### 5.30.4.2 Error\_Handler()

```
void Error_Handler (
    void )
```

Definition at line 926 of file [main.c](#).

#### 5.30.4.3 HAL\_TIM\_PeriodElapsedCallback()

```
void HAL_TIM_PeriodElapsedCallback (
    TIM_HandleTypeDef * htim )
```

Definition at line 918 of file [main.c](#).

#### 5.30.4.4 main()

```
int main (
    void )
```

Init all GPIO and drivers, start the task, init semaphore and queue and launch the kernel

- Config EXSTARTUP
  - Launch microRos, supervision, left motor, right motor and lcd task
- Config EXTEST\_UART2
  - Launch test\_uart2 task
- Config EXCORRECTOR
  - Launch test\_motor task
- Config EXTESTCORRECTOR
  - Launch supervision, left motor and right motor task
- Config EXTEST\_VL53
  - Launch test\_vl53 task
- Config EXTEST\_MICROROS
  - Launch microRos task
- Config EXFINAL
  - Launch microRos, supervision, left motor, right motor, vl53 and lcd task

Definition at line 760 of file [main.c](#).

#### 5.30.4.5 microros\_allocate()

```
void * microros_allocate (
    size_t size,
    void * state )
```

Definition at line 14 of file [microros\\_allocators.c](#).

#### 5.30.4.6 microros\_deallocate()

```
void microros_deallocate (
    void * pointer,
    void * state )
```

Definition at line 22 of file [microros\\_allocators.c](#).

#### 5.30.4.7 microros\_reallocate()

```
void * microros_reallocate (
    void * pointer,
    size_t size,
    void * state )
```

Definition at line 31 of file [microros\\_allocators.c](#).

#### 5.30.4.8 microros\_task()

```
void microros_task (
    void * argument )
```

- All config
  - Create the node *STM32\_node*
  - Set the Domain id of microRos
- Config EXSTARTUP :
  - Create a publisher and send a message on it
- Config EXTEST\_MICROROS :
  - Create a publisher, a subscriber and an executor
  - Init the executor and add the subscriber to it
  - Run the executor and send the receive message on the publisher
- Config EXFINAL :
  - Create 3 publishers, 5 subscriber and an executor
  - Init the executor and add the 5 subscribers to it
  - run the executor and if they are no elements waiting to be read by the task decision put the receive information in the queue If decison task send data then publish data to microRos

## Parameters

<i>argument</i>	
-----------------	--

Definition at line 168 of file [main.c](#).

#### 5.30.4.9 microros\_zero\_allocate()

```
void * microros_zero_allocate (
    size_t number_of_elements,
    size_t size_of_element,
    void * state )
```

Definition at line 44 of file [microros\\_allocators.c](#).

#### 5.30.4.10 SubscriberCallbackFunction()

```
void SubscriberCallbackFunction (
    const void * msgin )
```

callback call by microros when a message is receive here use as debug and just print the receive msg

## Parameters

<i>message</i>	receive
----------------	---------

Definition at line 156 of file [main.c](#).

#### 5.30.4.11 SystemClock\_Config()

```
void SystemClock_Config (
    void )
```

Configure the main internal regulator output voltage

Initializes the RCC Oscillators according to the specified parameters in the RCC\_OscInitTypeDef structure.

Initializes the CPU, AHB and APB buses clocks

Definition at line 11 of file [systemclock.c](#).

#### 5.30.4.12 task\_Grove\_LCD()

```
void task_Grove_LCD (
    void * pvParameters )
```

Task use to write information on LCD depending of the data in the LCD queue

- Config EXSTARTUP :
  - Print 'TEST' LCD on screen
- Config EXFINAL :
  - Print different messages depending of the actual mode

## Parameters

<i>argument</i>	
-----------------	--

Definition at line 473 of file [main.c](#).

**5.30.4.13 task\_Motor\_Left()**

```
void task_Motor_Left (
    void * pvParameters )
```

Task use to control the left motor of the robot

## Parameters

<i>argument</i>	
-----------------	--

Definition at line 385 of file [main.c](#).

**5.30.4.14 task\_Motor\_Right()**

```
void task_Motor_Right (
    void * pvParameters )
```

Task use to control the right motor of the robot

## Parameters

<i>argument</i>	
-----------------	--

Definition at line 411 of file [main.c](#).

**5.30.4.15 task\_Supervision()**

```
void task_Supervision (
    void * pvParameters )
```

Brain of the robot. get information for MicroRos and VL53 task, then send speed to left and right motor, lcd and microRos task

- Config EXSTARTUP :
  - Make the robot drive forward until an obstacle are found
- Config EXTESTCORRECTOR :
  - Make the robot drive forward at speed set by config
- Config EXFINAL :

- Make robot switch between 3 behaviour depending of the mode
- Obstacle : drive and avoid obstacles
- Manual : drive in direction set in ihm
- Camera : follow an object

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line 508 of file [main.c](#).

#### 5.30.4.16 task\_VL53()

```
void task_VL53 (  
    void * pvParameters )
```

task that get the value of the VL53 sensor and put it on the VL53 queue

#### Parameters

<i>argument</i>	
-----------------	--

Definition at line 438 of file [main.c](#).

#### 5.30.4.17 test\_motor()

```
void test_motor (  
    void * pvParameters )
```

Use to set the duty cycle and register the motor speed at each Te

Definition at line 880 of file [main.c](#).

#### 5.30.4.18 test\_uart2()

```
void test_uart2 (  
    void * pvParameters )
```

Use to test printf and scanf function

Definition at line 857 of file [main.c](#).

#### 5.30.4.19 test\_vl53()

```
void test_vl53 (  
    void * pvParameters )
```

Use to test the VL53 sensor

Definition at line 869 of file [main.c](#).

### 5.30.5 Variable Documentation

#### 5.30.5.1 defaultTask\_attributes

```
const osThreadAttr_t defaultTask_attributes
```

**Initial value:**

```
= {  
    .name = "defaultTask",  
    .stack_size = 3000 * 4,  
    .priority = (osPriority_t) osPriorityNormal,  
}
```

Definition at line 24 of file [main.c](#).

#### 5.30.5.2 defaultTaskHandle

```
osThreadId_t defaultTaskHandle
```

Definition at line 23 of file [main.c](#).

#### 5.30.5.3 hdma\_usart1\_rx

```
DMA_HandleTypeDef hdma_usart1_rx [extern]
```

Definition at line 6 of file [drv\\_uart.c](#).

#### 5.30.5.4 hdma\_usart1\_tx

```
DMA_HandleTypeDef hdma_usart1_tx [extern]
```

Definition at line 7 of file [drv\\_uart.c](#).

#### 5.30.5.5 hdma\_usart2\_rx

```
DMA_HandleTypeDef hdma_usart2_rx [extern]
```

Definition at line 8 of file [drv\\_uart.c](#).

#### 5.30.5.6 hdma\_usart2\_tx

```
DMA_HandleTypeDef hdma_usart2_tx [extern]
```

Definition at line 9 of file [drv\\_uart.c](#).

#### 5.30.5.7 hi2c1

```
I2C_HandleTypeDef hi2c1 [extern]
```

Definition at line 6 of file [drv\\_i2c.c](#).

#### 5.30.5.8 huart1

```
UART_HandleTypeDef huart1 [extern]
```

Definition at line 4 of file [drv\\_uart.c](#).

#### 5.30.5.9 huart2

```
UART_HandleTypeDef huart2 [extern]
```

Definition at line 5 of file [drv\\_uart.c](#).

#### 5.30.5.10 q\_mot\_L

```
xQueueHandle q_mot_L = NULL
```

Queue to communicate with left motor task

Definition at line 97 of file [main.c](#).

#### 5.30.5.11 q\_mot\_R

```
xQueueHandle q_mot_R = NULL
```

Queue to communicate with right motor task

Definition at line 98 of file [main.c](#).

#### 5.30.5.12 qhLCD

```
xQueueHandle qhLCD = NULL
```

Queue to communicate with LCD task

Definition at line 101 of file [main.c](#).

#### 5.30.5.13 qhMR\_pub

```
xQueueHandle qhMR_pub = NULL
```

Queue to communicate with microRos task

Definition at line 100 of file [main.c](#).

#### 5.30.5.14 qhMR\_sub

```
xQueueHandle qhMR_sub = NULL
```

Queue to get information from microRos task

Definition at line 99 of file [main.c](#).

#### 5.30.5.15 qhVL53

```
xQueueHandle qhVL53 = NULL
```

Queue to communicate with VL53 task

Definition at line 102 of file [main.c](#).

#### 5.30.5.16 tab\_speed

```
int16_t tab_speed[NB]
```

use to store speed of motor during calibration of the correcteur

Definition at line 105 of file [main.c](#).

#### 5.30.5.17 xSem\_Supervision

```
xSemaphoreHandle xSem_Supervision = NULL
```

Semaphore use in decision task

Definition at line 94 of file [main.c](#).

## 5.32 C:/Users/Administrator/Documents/GitHub/ENIB\_Robot\_Mobile\_Ros2/WORKSPACE\_F411\_uROS6/base\_robot/Core/Src/microROS.c File Reference

: Contain microROS default custom creator for subscriber and publisher

```
#include "main.h"
```

### Macros

- #define STRING 0

## Functions

- void [createPublisher](#) (rcl\_publisher\_t \*publisher, const rcl\_node\_t \*node, const rosidl\_message\_type\_support\_t \*type\_support, const char \*topic\_name, std\_msgs\_\_msg\_\_Int32 \*msg)
- void [createSubscriber](#) (rcl\_subscription\_t \*subscription, rcl\_node\_t \*node, const rosidl\_message\_type\_support\_t \*type\_support, const char \*topic\_name, std\_msgs\_\_msg\_\_Int32 \*msg)

### 5.32.1 Detailed Description

: Contain microROS default custom creator for subscriber and publisher

Definition in file [microROS.c](#).

### 5.32.2 Macro Definition Documentation

#### 5.32.2.1 STRING

```
#define STRING 0
```

Definition at line 8 of file [microROS.c](#).

### 5.32.3 Function Documentation

#### 5.32.3.1 createPublisher()

```
void createPublisher (
    rcl_publisher_t * publisher,
    const rcl_node_t * node,
    const rosidl_message_type_support_t * type_support,
    const char * topic_name,
    std_msgs__msg__Int32 * msg )
```

Create a publisher with default options

#### Parameters

<i>publisher</i>	microRos structure that represent a publisher
<i>node</i>	microRos structure that represent a node
<i>type_support</i>	microRos structure that represent the type of message
<i>topic_name</i>	The name of the topic
<i>msg</i>	microRos structure that represent the message

Definition at line 10 of file [microROS.c](#).

#### 5.32.3.2 createSubscriber()

```
void createSubscriber (
    rcl_subscription_t * subscription,
```

```

    rcl_node_t * node,
    const rosidl_message_type_support_t * type_support,
    const char * topic_name,
    std_msgs__msg__Int32 * msg )

```

Create a subscriber with default options

#### Parameters

<i>subscription</i>	microRos structure that represent a subscriber
<i>node</i>	microRos structure that represent a node
<i>type_support</i>	microRos structure that represent the type of message
<i>topic_name</i>	The name of the topic
<i>msg</i>	microRos structure that represent the message

Definition at line 29 of file [microROS.c](#).

### 5.38.1 Detailed Description

: Contain function to add printf and scanf function use the UART2 All credit to Carmine Noviello for this code <https://github.com/cnoviello/mastering-stm32/blob/master/nucleo-f030/R8/system/src/retarget/>

Definition in file [retarget.c](#).

### 5.38.2 Macro Definition Documentation

#### 5.38.2.1 STDERR\_FILENO

```
#define STDERR_FILENO 2
```

Definition at line 23 of file [retarget.c](#).

### 5.38.2.2 STDIN\_FILENO

```
#define STDIN_FILENO 0
```

Definition at line 21 of file [retarget.c](#).

### 5.38.2.3 STDOUT\_FILENO

```
#define STDOUT_FILENO 1
```

Definition at line 22 of file [retarget.c](#).

## 5.38.3 Function Documentation

### 5.38.3.1 \_close()

```
int _close (  
    int fd )
```

Definition at line 57 of file [retarget.c](#).

### 5.38.3.2 \_fstat()

```
int _fstat (  
    int fd,  
    struct stat * st )
```

Definition at line 88 of file [retarget.c](#).

### 5.38.3.3 \_getpid()

```
int _getpid (  
    void )
```

Definition at line 98 of file [retarget.c](#).

### 5.38.3.4 \_isatty()

```
int _isatty (  
    int fd )
```

Definition at line 35 of file [retarget.c](#).

#### 5.38.3.5 `_kill()`

```
int _kill (
    int pid,
    int sig )
```

Definition at line 103 of file [retarget.c](#).

#### 5.38.3.6 `_lseek()`

```
int _lseek (
    int fd,
    int ptr,
    int dir )
```

Definition at line 65 of file [retarget.c](#).

#### 5.38.3.7 `_read()`

```
int _read (
    int fd,
    char * ptr,
    int len )
```

Definition at line 74 of file [retarget.c](#).

#### 5.38.3.8 `_write()`

```
int _write (
    int fd,
    char * ptr,
    int len )
```

Definition at line 43 of file [retarget.c](#).

#### 5.38.3.9 `RetargetInit()`

```
void RetargetInit (
    UART_HandleTypeDef * huart )
```

Reconfigure stdin, stdout and stderr to use UART

##### Parameters

<i>huart</i>	Structure wich represent an UART
--------------	----------------------------------

Definition at line 27 of file [retarget.c](#).

## 5.38.4 Variable Documentation

### 5.38.4.1 gHuart

UART\_HandleTypeDef\* gHuart

Definition at line 25 of file [retarget.c](#).

### 5.41.2 Function Documentation

#### 5.41.2.1 HAL\_InitTick()

```
HAL_StatusTypeDef HAL_InitTick (  
    uint32_t TickPriority )
```

This function configures the TIM1 as a time base source. The time source is configured to have 1ms time base with a dedicated Tick interrupt priority.

#### Note

This function is called automatically at the beginning of program after reset by HAL\_Init() or at any time when clock is configured, by HAL\_RCC\_ClockConfig().

#### Parameters

<i>TickPriority</i>	Tick interrupt priority.
---------------------	--------------------------

#### Return values

<i>HAL</i>	status
------------	--------

Definition at line 41 of file [stm32f4xx\\_hal\\_timebase\\_tim.c](#).

#### 5.41.2.2 HAL\_ResumeTick()

```
void HAL_ResumeTick (  
    void )
```

Resume Tick increment.

#### Note

Enable the tick increment by Enabling TIM1 update interrupt.

## Parameters

None	
------	--

## Return values

None	
------	--

Definition at line 122 of file [stm32f4xx\\_hal\\_timebase\\_tim.c](#).

**5.41.2.3 HAL\_SuspendTick()**

```
void HAL_SuspendTick (
    void )
```

Suspend Tick increment.

## Note

Disable the tick increment by disabling TIM1 update interrupt.

## Parameters

None	
------	--

## Return values

None	
------	--

Definition at line 110 of file [stm32f4xx\\_hal\\_timebase\\_tim.c](#).

**5.41.3 Variable Documentation****5.41.3.1 htim4**

## 5.46 C:/Users/Administrator/Documents/GitHub/ENIB\_Robot\_Mobile\_↵ Ros2/WORKSPACE\_F411\_uROS6/base\_robot/Core/Src/sysmem.c File Reference

STM32CubeIDE System Memory calls file.

```

#include <errno.h>
#include <stdint.h>

```

### Functions

- void \* [\\_sbrk](#) (ptrdiff\_t incr)  
*[\\_sbrk\(\)](#) allocates memory to the newlib heap and is used by malloc and others from the C library*

### Variables

- static uint8\_t \* [\\_\\_sbrk\\_heap\\_end](#) = NULL

### 5.46.1 Detailed Description

STM32CubeIDE System Memory calls file.

#### Author

Generated by STM32CubeIDE

```
For more information about which C functions
need which of these lowlevel functions
please consult the newlib libc manual
```

#### Attention

Definition in file [sysmem.c](#).

### 5.46.2 Function Documentation

#### 5.46.2.1 \_sbrk()

```
void * _sbrk (
    ptrdiff_t incr )
```

[\\_sbrk\(\)](#) allocates memory to the newlib heap and is used by malloc and others from the C library

```
* #####
* # .data # .bss #          newlib heap          #          MSP stack          #
* #          #          #          #          # Reserved by _Min_Stack_Size #
* #####
* ^-- RAM start          ^-- _end                      _estack, RAM end --^
*
```

This implementation starts allocating at the '\_end' linker symbol The '\_Min\_Stack\_Size' linker symbol reserves a memory for the MSP stack The implementation considers '\_estack' linker symbol to be RAM end NOTE: If the MSP stack, at any point during execution, grows larger than the reserved size, please increase the '\_Min\_Stack\_Size'.

#### Parameters

<i>incr</i>	Memory size
-------------	-------------

#### Returns

Pointer to allocated memory

Definition at line 53 of file [sysmem.c](#).

### 5.46.3 Variable Documentation

#### 5.46.3.1 `__sbrk_heap_end`

```
uint8_t* __sbrk_heap_end = NULL [static]
```

Pointer to the current high watermark of the heap usage
